

The QR codes in the layout show you the factory design in 3D format.

The drawing includes two kinds of codes: one takes you to 360 images of the factory design and another to the full 3D model of the same. By reading the QR code with a mobile phone or a tablet, the web browser will download a 360 picture or a 3D model. If you use a laptop, you need to click the web link or copy the web address below the QR code to your web browser.

Please note:
The full 3D model is a large file so all mobile phones may not be able to open it, or you may need to empty the memory in order to open the file. However, the model works very well with tablets and computers.

The QR codes and the links are valid for 3 months from the date of the drawing. If you need an extension to the validity period, please contact Elematic Sales.

ATTENTION:
The 3D layout is property of Elematic Oyj. It is meant solely for the use of the customer and it cannot be released or transferred to any external parties without a written permission from Elematic Oyj. Publishing the QR code or the link to the model without a written permission from Elematic Oyj is strictly forbidden.
